

## An Essay of Self-Introduction

*Must be the best not in but for the world is my motto. It means, I must develop my potential to have positive impact on society.*

I enclose my CV for consideration for the selection of "MahasiswaBerprestasi". I am currently a 3<sup>rd</sup> year Industrial Engineering student at Brawijaya University, Malang.

My name is AyunRestuWuryansih and I am from Surabaya. Having mentioned university, the question immediately arising is of course that of what I study. I major in Industrial Engineering and minor in Industrial System Management. I was currently studying here for 3,5 years.

As a student in Industrial Engineering, I am receiving a particularly well-rounded education in engineering, complemented by sciences and humanities. I improved my study skills and I have earned a grade point average of 3,4 over the last 5 semesters. During my studying in university, I became interested in organization and began to join student organization, that would give me great moment to socialize, known a lot of people, develop my personality (such as learning and seeing the problem from the other side), capability in communication, etc.

My interest in the organization began while I was in high school. I was first introduced to many different personality and condition of people as a member of BPH OSIS. Opportunity to join in one of AIESEC's event and be peer educator for global issue, that's HIV-AIDS, made me more appreciate about humanities, which I know will be extremely helpful to me in establishing my self. At that moment, I got many experiences because I built a network with the other people from the other country.

At university, I have joint many kinds of organization, they are DewanTeknik, PMK Yehezkiel, UAKK, IMTI, and SRK laboratory. And also, I have join in many different comitee to hold an event. During my organization time, I learned a lot of thing and gained my organizational skill. I am well accustomed to working successfully in teams, as I am the comiteecaptain of "IbadahPerayaan Natal" and captain of department 1 in PMK Yehezkiel that manage and hold the schedule of activity. When money always be main problem to hold an event, I liked think creative to get it. As for keeping cool under pressure, my experience joining many kind of organization demonstrate my ability to handle stressfull situations with tact and patient, while achieving desired results.

Working in private course as teacher and HRD officer is the other activity during studying at university. I got the job because I wanna get many experience and get money by myself. My organizational skill were honed during my study at university when I juggled that job as well as my activity in organization, and received excellent grades despite pressure of time. and also, to develop my softskill, I got some training about entrepreneurship, leadership, and networking

I am particularly interested in industrial management and wanna be an industrial consultant because my skill and experiences lend themselves most readily to this area. I observed that an

*AyunRestuWuryansib*

industrial consultant need to be highly organized, to know well the truth condition in industry, to set, to manage the source, to inform and communicate the problem, and have to capability to have different thinking, innovative, and creative to solve the problem.

In my spare time, I enjoy playing music with electone and writing a note which I hope can motivate the other, and sometimes I playing music, like electone.

Now, I am concerning to develop SRK laboratory. As the assistant with 7 others, we have focus on get information about statistic and making module more complex to increase in statistic and quality engineering capability.

Must be the best not in but for the world is my motto. It means, I must develop my potential to have positive impact on society.

Thank you for taking the time consider my application. I hope you view my application favourably and I am available for interview at anytime.
